

Remarks

The Examiner has required an election in the above-identified application as follows:

1. **Group I, claim(s) 12-18, drawn to a method of preparing a continuous strand mat.**
2. **Group II, claim(s) 19-22, drawn to an installation for manufacturing mats.**

Thus, the **11** claims pending in this application have been separated into two separate groups. Applicants hereby elect, with traverse, **Group I, claim(s) 12-18** for examination purposes only.

Applicants respectfully traverse on the grounds that examination of all of the claims would not pose an undue burden on the Examiner. According to section 803 of the Manual of Patent and Examining Procedure, “[i]f the search and examination of all the claims in an application can be made without serious burden, the examiner must examine them on the merits, even though they include claims to independent or distinct inventions.” (*See Manual of Patent Examining Procedure*, Patent Publishing, LLC, Eighth Ed., Rev. 3, August 2005). There are only **11** claims in this application, and searching the **4** claims classified by the Examiner into **Group II** would not pose a serious burden. Accordingly, Applicants submit that it would not pose an undue burden on the Examiner to examine all of the **11** claims pending in the subject application.

Conclusion

In light of the above, Applicants believe that this application is now in condition for allowance and therefore request favorable consideration.
